Desert Spring Eco-Products Listed in Built Green Product Catalogue
Builders Earn Points for Installing Water-efficient Pulse Humidifier

MISSISSAUGA, ON – Built Green Canada is a national organization that manages an industry-driven, voluntary program to promote “green” building practices that reduce the environmental impact of residential new construction. The BUILT GREEN® program encourages sustainable residential development by focusing on energy-efficiency, waste-reduction, preservation of natural resources, improved IAQ, home durability as well as reduced maintenance and water usage.

Desert Spring Eco-Products is proud to announce that its water-efficient Pulse Flow-through Humidifier is now part of the BUILT GREEN® program and the installation of this product earns a prospective builder a BUILT GREEN® checklist point for their homes. The Pulse Flow-through Humidifier is a Canadian-made product with a patented technology to reduce water use by up to 88% without sacrificing performance. The Pulse Humidifier is only available as a professionally installed product through qualified HVAC contractors.

DSEP is a private company with the near-term vision of significantly increasing its presence in the North American whole house indoor air quality market. DSEP currently develops, manufactures, and markets a patented line of premium humidifiers and related products. DSEP has won a number of awards and recognitions for its patented Rotary Disc Humidifier since its introduction in 1997.
