Desert Spring and Trion Enter into Humidifier Arrangement
Reciprocal supply deal offers growth opportunity for both companies

MISSISSAUGA, ON – Desert Spring Eco-Products Ltd. (“DSEP”) and TRION IAQ, Division of Air System Components, Inc. (“TRION”) have agreed to work towards a reciprocal supply arrangement that will seek to take advantage of each company’s relative strength in their home markets.

The agreement starts with DSEP supplying TRION with an entry-level flow-through humidifier for the US market. Later in 2013, TRION is expected to supply DSEP with its large capacity flow-through and fan-powered models for the Canadian market. Other products are also under consideration and both companies look forward to building a long term win-win relationship.

According to Mitchell Johnston, TRION Director of Residential Sales, the two companies make a great fit with complementary products and should have a lot to gain from a presence in each other’s territory.

Based in Sanford, NC, TRION is an HVAC industry leader, providing high-quality IAQ products for commercial, industrial and residential markets since 1947.

DSEP is a private company with the near-term vision of significantly increasing its presence in the North American whole house indoor air quality market. DSEP currently develops, manufactures, and markets a patented line of premium humidifiers and related products. DSEP has won a number of awards and recognitions for its patented Rotary Disc Humidifier since its introduction in 1997.
